

MAKE A DIFFERENCE

Are you a licensed clinician with a passion for patient training? Join us as a Clinical Patient Trainer and help patients live healthier lives with their respiratory therapy devices from Baxter.

RESPONSIBILITIES

As a Clinical Patient Trainer you will become an expert on the latest respiratory health products from Baxter. Then you will bring your knowledge and clinical experience directly to our Baxter patients, helping them with:

- Training on non-invasive ventilation
- Training on other respiratory therapies including high frequency chest wall oscillation (HFCWO) and mechanical insufflation-exsufflation (MIE)
- Educate and empower patients to achieve optimal therapy outcomes
- Device set up and ongoing follow-up to ensure therapy success

QUALIFICATIONS

Passion for educating and training patients on respiratory therapies prescribed for use in their home

- Graduation from an accredited respiratory care, nursing or physician assistant program
- Current, active license in your state of practice
- Ability to work independently and flexibility to accommodate patient schedules
- Previous clinical experience in acute care, related therapies or home care/DME training preferred
