

Hillrom™

CONTACT-FREE TEMPERATURE SCREENING

With the shift in requirements to quickly screen temperature, our clinical-grade non-contact forehead thermometer meets your evolving needs.

**WELCH ALLYN®
CARETEMP™
TOUCH FREE
THERMOMETER**

- Measurement feedback system detects proper operating distance for consistent accuracy.
- Take about 3,000 readings on two AAA batteries.
- Compatible with many medical grade cleaners to help minimize the risk of cross-contamination.
- 2-year warranty

SCREEN AND VERIFY TEMPERATURE SAFELY

Primary Care is facing new pressures to work differently and keeping patients and staff safe from infections has never been more important.

Hillrom has a complete thermometry portfolio with Welch Allyn® thermometers to capture quick, baseline screenings and verify any concerning readings in more accurate body sites.

Welch Allyn® CareTemp™ Touch Free Thermometer

Screens temperature contact-free from the forehead in seconds. Our clinical-grade distance feedback technology lets the screener know when they are in range for more accurate readings.

Welch Allyn® Braun ThermoScan® PRO 6000 Ear Thermometer

Captures readings quickly and minimizes risk with a disposable probe cover for each reading. And our PerfectTemp® technology accounts for positioning's impact on readings, a common concern with ear thermometers.

Welch Allyn® SureTemp® Plus 690 Electronic Thermometer

Widely used in acute and primary healthcare settings as the gold standard for accurate oral/axillary/rectal temperature readings. Minimize risk with a disposable probe cover for each reading.
