Baxter

CARDIO SERVER

SAME GREAT SYSTEM — CONVENIENTLY IN THE CLOUD

Simplify cardiopulmonary data management with Cardio Server Cloud. Delivering secure information technology is at the heart of our solution. With Cardio Server Cloud services, you can reduce server requirements, storage, and IT costs. Save your hospital time and resources to focus on delivering high-quality patient care while we focus on the rest.
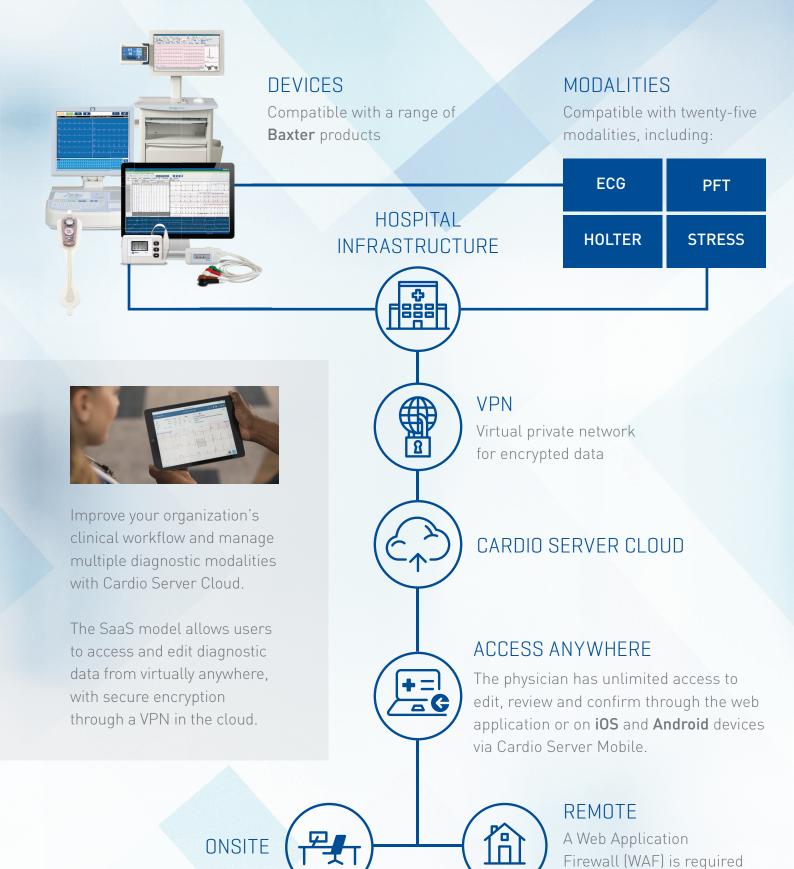

SECURE DATA MANAGEMENT AND STORAGE

- Proactive system monitoring
- Enhanced cybersecurity, virus and malware protection
- Single-tenancy — one hospital system to a server
- Server hardware and periodic upgrades
- Test environment
- Supports mobile technology — secure access from anywhere

CONSERVE RESOURCES

- Reduce hospital's IT expenses and footprint
- Reduce server and storage requirements
- Baxter software and security upgrades/patches included
- Third-party software upgrades/patches included
- Backup and disaster recovery included
- Operating budget versus capital budget
