

CARDIO SERVER

MANAGE DIGITAL
DIAGNOSTIC DATA WITH EASE

Cardio Server ECG Management System, previously branded as Epiphany Cardio Server, is now part of the Baxter cardiology portfolio as an ECG software solution.

Cardio Server is a web-based, user-friendly application that receives, manages, and exports diagnostic test data from over 260 devices to EMRs. With Cardio Server, creating confirmed, digitally signed ECGs, stress, Holter, PFT, cardiac rehab, and other diagnostic test reports is simple and fast.

MULTI-MODALITY, MULTI-VENDOR

Over 260 devices from over 80 vendors in 25 diagnostic modalities

IT FRIENDLY, WEB-BASED APPLICATION

No special application required;
software-only application integrated with all major EMRs

SIMPLE ON-LINE READING

One-click confirmations for normal ECGs with Intelligent Serial Comparison

COST EFFECTIVE EMR INTEGRATIONS

Cut costs by purchasing one bi-directional EMR interface for all modalities

CUSTOMIZABLE REPORT TOOL

Run reports that assist with billing, administrative needs, and workflow analysis with Analytica

IMPROVED CLINICAL WORKFLOW

Advanced ECG rendering tools and caliper functionality

Caliper mode allows users to accurately measure and modify ECGs.

Features include clinical editing tools such as format, filters, gain, and more.

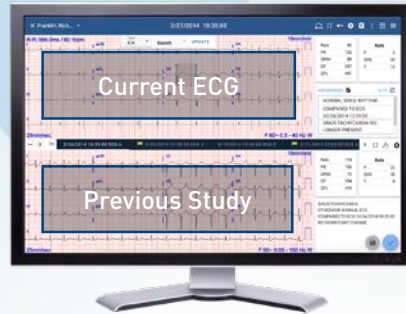

ACCESS REPORTS VIRTUALLY ANYWHERE

Compatible with your **iOS** and **Android** mobile devices, Baxter offers Cardio Server Mobile. Physicians can edit, confirm, and print diagnostic test data from anywhere in the hospital, the office, or home.

MULTIPLE MODALITIES AT ONCE

One-click access to previous diagnostic test results on the same screen.

Quickly see additional results including: stress; Holter; cardiac rehab; ambulatory monitors; and more.

CARDIO SERVER MODALITIES AND ACCESSIBILITY

MODALITIES

Compatible with twenty-five modalities, including:

CARDIO SERVER
