THE NEXT GENERATION OF VITAL SIGNS MONITORS
IS HERE.

INTRODUCING

Welch Allyn Connex®
Vital Signs Monitor 6000 Series

WelchAllyn®

Advancing Frontline Care™

Simplicity. Two devices in one.
Out-of-the-box connectivity.
And a full-color touchscreen display.

Introducing the Welch Allyn
Connex® Vital Signs Monitor 6000 Series.

Your continuous and spot-check vital signs monitor in one.

Say hello to simplicity | The Connex Vital Signs Monitor (VSM) can be used across procedure and general exam environments for continuous monitoring and spot checking needs, reducing your training requirements by enabling staff to standardize procedures for the vitals capture process on one device.

Easy to use | The Connex VSM features a new large full-color touchscreen display that is bright, visually intuitive to operate, and provides quick access to all device settings and controls. No need to navigate through time-consuming and confusing menus with difficult-to-understand codes.

Patient monitoring the way you need it | The Connex VSM can be fully configured with blood pressure intervals set for predefined cycle times or customized with programmable cycle time options. Plus, alarm levels and status are displayed on the home screen and can be easily accessed for immediate control. Prominent visual and audible alarms grab your attention and provide the alarm priority level and the specific cause so you can react accordingly.

Improved battery life | The Connex VSM can operate from an AC outlet or using a high-performance lithium ion battery which reaches 85% recharged capacity in only two hours and 100% recharged capacity in only four hours of plug-in time. No longer do you have to worry about long recharge times.

Get connected | The Connex VSM comes connectivity-ready, allowing you to integrate with the electronic health records (EHR) system you have now or one you'll get in the future. This allows clinicians to take, save and review accurate patient vitals data, reducing documentation errors and improving patient safety.

Finally a solution to all of those tangled cords | The optional accessory cable management stand has a place for everything so you have an organized, professional-looking stand that minimizes cord tangles, protects accessories and is designed for easy cleaning to help prevent cross contamination.

Ideal for:

> Ambulatory Care Clinics
> Cancer and Oncology Clinics
> Community Health Centers
> Endoscopy Clinics
> Multi-Specialty Centers
> Outpatient Surgery Centers
> Plastic Surgery Centers
> Specialty Physician Offices
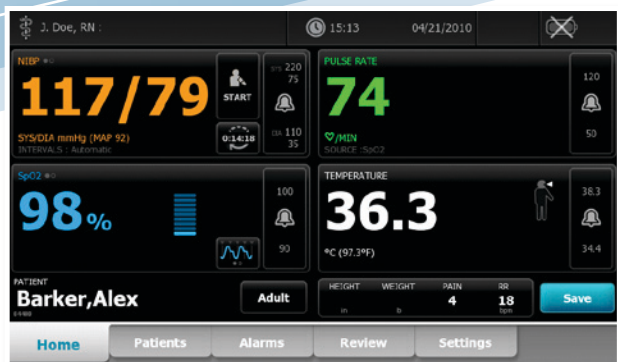

Home Screen Tab

> Displays vital-signs main screen and provides shortcut buttons to key controls (alarms, NIBP intervals, patient name and modifiers, temp mode)
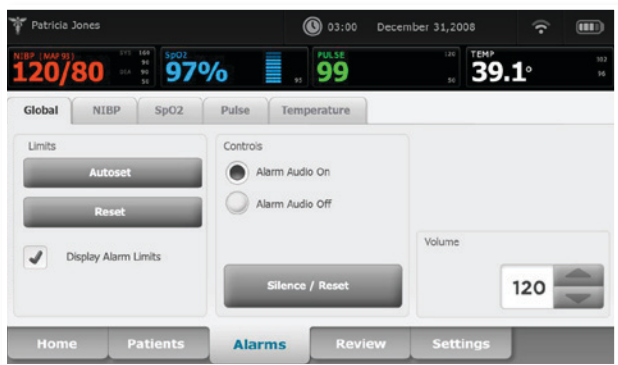

Alarm Screen Tab

> Accesses global alarm settings (audio volume, global reset, etc.), individual vital alarm settings (on/off), and vital alarm high/low limit settings
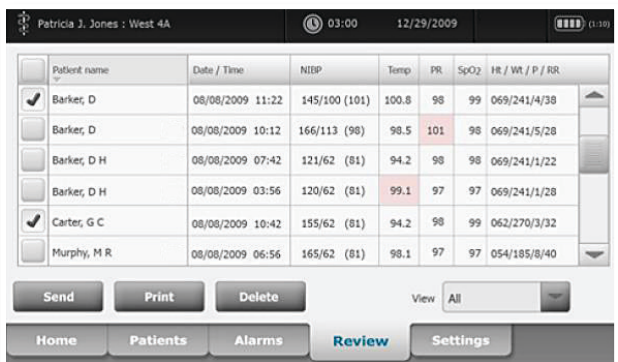

Review Screen Tab

> View, print, and delete saved patient data

Industry-Leading Parameters

The Connex Vital Signs Monitor features:

> SureTemp® Plus oral, pediatric axillary, adult axillary and rectal thermometry
> Braun ThermoScan® PRO 4000 ear thermometry
> Fast 15-second SureBP® blood pressure measurement
> Masimo® or Nellcor® Pulse Oximetry (SpO$_2$) with percentage or waveform display

NIBP Type Selection

> SureBP®—takes blood pressure upon inflation for the fastest speed on the market (about 15 seconds) and with greater patient comfort
> Step Deflation—allows customized pressure preset setting for adult, pediatric and neonatal patients
> Ships with Adult and Large Adult Welch Allyn FlexiPort® Blood Pressure Cuffs

Visible and Audible Alarms

> LED light bar illumination of the handle and parameter frame color change combined with audible pulse tones grab attention
> New alarm features alert you to different levels of alarm priority (e.g., NIBP or SpO$_2$ limit exceeded = flashing red; pulse rate limit exceeded = flashing yellow; temperature limit exceeded = solid yellow), allowing you to immediately react accordingly

Home Screen

> Visually intuitive to operate, making it easier to learn and train staff
> Provides quick access to multiple feature settings so you can easily configure the device's operation to best suit your needs
> "Save" button stores patient vitals data and clears screen for next reading
> Allows you to manually enter patient data such as height, weight, pain and respiration rate
> Monitor, Spot Check and Triage profiles provide access to different feature set configurations. Select the profile that matches your application.

USB Accessory Ports

Depending on the model you choose, one or four USB ports are included in your monitor to allow for additional accessory plug-ins such as the accessory cable management stand LED light or the Braun ThermoScan® PRO 4000 ear thermometer.

Partners in Care Services[SM]

Protection throughout the life of your investment, with flexible programs that cover all of your service needs. While product warranties provide basic assurance of Welch Allyn hardware quality, they may not include the full range of services and support you need to achieve your service level and cost objectives.

Comprehensive Partnership Programs available in one-year and two-year service agreements.
