

User-Friendly ECG Design Helps Provide Reliable Data for Clinicians at Richmond Heights Medical

Customer

Richmond Heights Medical Center (University Hospitals)

Location

Richmond Heights, OH

Facility Profile

University Hospitals is one of the nation's leading health care systems, providing high-quality, patient-centered medical care at locations throughout Northeast Ohio. The System's 1032-bed, tertiary medical center, University Hospitals, is an affiliate of Case Western Reserve University. More than 28,000 physicians and employees constitute University Hospitals and its partnership hospitals, ranking it Northeast Ohio's second largest private sector employer. UH performs more than 10.8 million outpatient procedures and over 142,000 inpatient discharges annually.

Brad Ronevich, RN, describes how the user-friendly design of the [CP 150™ Resting ECG](#) helps provide accurate data with an efficient workflow at Richmond Heights Medical Center.

Efficient, User-Friendly Design

"I find the CP 150 to be easy to use, reliable and safe for adult and pediatric patients. Data is accurate and quick to obtain, which is especially helpful with children. The touchscreen and ability to preview reports prior to printing is a big time saver."

Convenient and Connected Workflow

"Personally, I appreciate that the [CP] 150 allows for simultaneous viewing of the waveforms of all 12 leads of the ECG, avoiding the need to switch between screens to view them all in real time. Also, the ability to send and manage ECGs via USB and Ethernet connectivity makes it convenient."

What is your experience with Welch Allyn solutions?

"They seem to always be reliable and I have never seen [a CP 150 ECG] broken in my three years."
