

January 15, 2026

Dear Valued Customer,

We are pleased to announce that Baxter is releasing a new scanner that is able to read High Frequency and Low Frequency RFID tags in addition to 1D and 2D barcodes. The new Dual RFID scanner is the “Diamond Barcode/Dual Frequency RFID Scanner and Holster Kit”, part number 7000-FHR4.

The Diamond Dual RFID scanner is only compatible with the **Welch Allyn Connex** Spot Monitor (CSM) at this time and requires CSM Firmware 1.30.00 or greater. The scanner requires CSM Firmware 1.54.01 or greater for Single Sign-On (SSO) functionality.

The scanner will ship with a coiled cord and scanner holster. Replacement coiled cords and replacement scanner holsters will also be available for individual purchase.

Additionally, Baxter is discontinuing the “**JADAK** Barcode/High Frequency RFID Scanner”, part number 7000-916HSR, but will continue selling the scanner until inventory is depleted. Baxter recommends the new Diamond Dual RFID scanner as the replacement for the 7000-916HSR scanner.

New Dual RFID Scanner

Diamond Barcode/Dual Frequency RFID Scanner and Holster Kit, Part Number: 7000-FHR4

Scanner Replacement Parts

Universal Scanner Holster Kit, Part Number: 108781

Note: Not all scanners and replacement kits are available in every country. Please consult your local Baxter sales representative or customer care with any questions.

Reading RFID Tags with the 7000-FHR4 Scanner

To read an RFID tag with the 7000-FHR4 scanner, bring the RFID tag within 3 inches (7.62 cm) or into contact with the back of the scanner opposite the trigger button. When a tag is detected, the scanner trigger LED will begin flashing and the tag will automatically be read.

If you desire the Diamond Dual RFID scanner to be configured, please contact the Baxter technical support team at www.baxter.com/contact-us.

To obtain more information about the 7000-FHR4 scanner, please visit Hillrom.com or contact your local Baxter sales representative or customer care for additional details.

Sincerely,

James Bennett
